Citizens of Seattle

Re: Report Of Contributions and Expenditures In The 1997 City Election

Dear Citizen:

The attached report is published by the Seattle Ethics and Elections Commission, in compliance with the Seattle Municipal Code 2.04.060(B)(9), to give you information about the financing of the 1997 Seattle City campaigns. It was compiled from the campaign finance disclosure reports that the candidates and ballot issue committees were required to file, under the Seattle Elections Code.

The 1997 election involved more City office candidates than ever reported in Seattle. This can be attributed to the open Mayoral race in which three sitting Council incumbents (Chow, Chong and Noland) gave up their seats to run. Thus, there were four open positions on the ballot. In addition, an “extra” Council position appeared on the ballot. In 1996, Councilmember John Manning resigned two years into his four year term. Richard McIver was appointed to serve in that position until the 1997 election results were certified. Thus, Council Position 3 was unexpectedly on the ballot in 1997, though the four year term does not expire until 1999.

The report graphically illustrates the dramatic increase in the cost of Seattle ballot issue and local office campaigns. Over $2.5 million was raised by the 1997 candidate and ballot issue campaigns, much more than the $2.2 million raised by such campaigns in 1995. Over $1.1 million was raised in the 1997 Mayoral and City Attorney races, compared to about $450,000 in the 1993 election. City Council candidates raised $839,000 in 1997, compared to $892,000 in 1995 and $420,000 in 1993. Ballot Issue fundraising was not as active in 1997, only $520,000 was raised by the four ballot issue committees, compared to almost $1.4 million in 1995, the year the Commons issue first appeared on the ballot. Disclosure and contribution limits have not eliminated the influence of money on elections.

Since July 1995, we have distributed reports of the campaign finances of City office candidates and City ballot issue committees, in paper copy and on the Internet at http://www.ci.seattle.wa.us/~seec/ This report will soon appear at that address. Since the 1997 campaigns are not required to file final reports until May 10, 1998, we will issue a 1997 Final Election Report in June 1998.

We hope this report assists you in understanding and participating in City government. If we can provide more information, please call us at 206/684-8500, e-mail us at director.seec@ci.seattle.wa.us, or come into the office at 226 Municipal Building, 600 Fourth Avenue, Seattle, 98104. We welcome your interest.

Sincerely,
Carolyn M. Van Noy,
Executive Director

I. INTRODUCTION

The information for this report was compiled from reports filed by each candidate and ballot issue committee. It is reported for a period from the beginning of each campaign through the following dates: monetary contributions are reported through November 4, 1997, in-kind contributions are reported through October 28, 1997, and expenditures are reported through November 30, 1997, except where a candidate’s reports were not timely. Also, amendments filed after October 28, 1997 are not included.

Throughout this report, the names of ballot issues may be followed by “Passed”/“P” or “Failed”/“F” and candidate names may be followed by an “Incumbent”/“I” and/or “Elected”/“E”. All City office elections are non-partisan, so party affiliation is not relevant. The following is a list of 1997 City primary and general election (in bold) ballot issues and candidates:

Table 4 shows total contributions to committees for which the candidate never appeared on the ballot for that office. Please note that these contribution numbers are not included anywhere else in this report. Also note that the numbers shown in Table 3 are gross contributions to that committee. In many cases some of these contributions were transferred to committees for another office. Such transfers are not reflected here.

B. Size Of Contributions

The following pie charts graphically report the size of in-kind and monetary contributions received. These graphs include candidate contributions to their own campaigns, transfers from a previous campaign, anonymous contributions, loans and miscellaneous receipts such as receipts from a low-cost fundraiser and interest from a bank account. All of these categories are broken out separately on the graph. Loans from a candidate to their own committee are categorized as candidate contributions until repaid. Figure 4 reports the percentage of receipts in amounts of $25 or less, between $25.01 and $99.99, between $100.00 and $399.99 and $400 or more. Figure 4 is influenced by the predominance of contributions over $100 to the ballot issue committees, as reported in Figure 5 (see also Figures 7 to 12). Figure 6 reports that approximately 75% of the contributions to candidates were over $100, whereas 95% of the contributions to ballot issue committees were over $100. Figures 13 to 25 support that conclusion.

Please note that these graphs show the proportion of each campaign’s dollar receipts from each type of source, not the proportion of the number of contributors in each type of source.

C. Area Of Contributors

The following pie charts report the areas that the contributors reported were the locations of their home or business addresses. The areas inside the City limits include Capitol Hill/Madrona, Queen Anne/Magnolia, Downtown, Greenlake/University District, West Seattle, Ballard/NW Seattle and Mt. Baker/Rainier Valley. The report also includes contributions from Outside of the City and “Area Unknown.” Receipts from the following sources are broken out in to their own categories: candidate contributions or loans to his or her own campaign, loans to ballot issues, miscellaneous receipts such as bank interest or receipts from a low cost fundraiser, transfers from a previous campaign, and anonymous contributions.

Figure 49 reports that the plurality of contributions for all campaigns were from Downtown. This, too, was influenced by the ballot issue committees. Figure 50 reports that the ballot issue...
committees received nearly 60% of their contributions from outside of the City and another 25% from Downtown, while Figure 51 reports that the candidate committees received only 10.7% of their contributions from Downtown, nearly 19% from outside of the City, and 17% from Capitol Hill/Queen Anne/Magnolia. For the most part, the individual campaign pie charts in Figures 52 to 71 confirm that conclusion.

B. Types Of Expenditures

Each campaign itemized all expenditures over $50 and provided a code for each that identified its purpose. The following is an explanation of each code used to identify the purpose of each expenditure, i.e., the type of expenditure:

- **Fundraising:** (F) Fundraising
- **Literature/Mail:** (L) Literature, includes fundraising mailings
  (P) Postage, includes fundraising mailings
- **Miscellaneous:** (C) Monetary, In-Kind and Earmarked Contributions
  (I) Independent Expenditures
  (V) Voter Signature Gathering
- **Operations:** (S) Surveys & Polls
  (T) Travel, Accommodations, Meals
  (G) General Operation and Overhead
- **Staff & Consultants:** (M) Management and Consulting Services
  (W) Wages, Salaries and Benefits
- **TV/Radio Advertising:** (B) Broadcast Advertising
• Newspaper/Other Advertising (N) Newspaper & Periodical Advertising
  (O) Other Advertising

The report also utilizes a category titled “In-Kind/Uncoded.” This category consists of expenditures that the campaigns are not required to itemize and/or code, i.e., contributions under $50 and in-kind contributions (which are listed as contributions and expenditures, since they would have been expended from campaign funds if they had not been given as in-kind contributions). Also included here are expenditures where the campaign has failed to report a required code.

Figure 75 reports the expenditures of all campaigns by the categories listed above. While it reports that most expenditures were for Literature/Mail in all campaigns, Figures 76 and 77 indicate that the ballot issue committees spent a greater percentage of their funds for TV/Radio/Newspapers than did candidate committees. Figures 78 to 96 confirm that conclusion.

V. YEAR TO YEAR TRENDS

A. Total Contributions Received, Averaged By Council Position

Figure 97 reports that the 1997 candidates raised _____________ than the 1995 candidates and the 1995 Council candidates raised nearly twice as much as the 1993 Council candidates. In 1993, the total contributions to the candidates running for all four Council positions was $415,480 ($103,870 per position). In 1995, the candidates for the five Council positions raised $896,125 ($179,225 per position). In 1993 and in 1995, the positions included one open seat.

![Historical Contributions Raised

Figure 155

B. Average Contribution To Council Campaigns

The Seattle Elections Code imposes a $400 limit on contributions to each candidate. Seattle no longer has expenditure limits, however. The United States Supreme Court has ruled that expenditure limits may not be imposed on candidates without giving them something in return. See Buckley v. Valeo, 424 U.S. 1, 96 SCt 612, 46 L.Ed.2d 659 (1976). Prior to 1992, the Seattle Elections Code required expenditure limits of those City office candidates who accepted partial public financing. In November 1992, Washington voters
passed Initiative 134, which prohibits the use of public funds for state or local elections. As a result, Seattle lost the authority to offer partial public financing of campaigns and with it the authority to impose expenditure limits.

The 1975-1987 information on Table 3, below, was compiled by the former Seattle Elections Administrator, Allen Miller. That segment of the Table lists the average contribution to "highly contested City Council races." Unfortunately, we do not have data from 1989 or 1991. The data we have added for 1993 through 1997 reports the average contribution to all City office campaigns in those years. Despite the difference in scope, the trend is clear. During the years when Seattle had public financing: 1979, 1981 and 1987, the average contribution was lower than the previous and following years in which public financing was not in place.

Please note that averages for 1993 and earlier were calculated without using the number of contributors of $25 or less in the equation. This will make these numbers shown higher than if a true ‘apples to apples’ comparison were possible.

Also note that the 1993 average is revised from the SEEC’s 1995 Election report. The number shown in the 1995 report was not calculated properly.

Table 10

Table 4 lists the average contributions to ballot issue committees. In 1995, we calculated the average contribution to City ballot issue committees. The six City ballot issue committees received a total of $1,357,567.74 in contributions from 2,929 contributors (contributors are counted more than once if they gave to more than one campaign), resulting in the average contribution of $452.31 to ballot issue committees. In 1996 contributors gave $ to the ballot issue committees, resulting in the average contribution of $. In 1997, contributors gave $ to the three ballot issue committees, resulting in the average contribution of $.

Figure 98 reports the average contributions listed in Tables 3 and 4.
